**CURRENT BIKE INFORMATION**

Please take all measurements in cm

Maker \_\_\_\_\_

Size \_\_\_\_\_

Model \_\_\_\_\_

Year \_\_\_\_\_

**THE FOUR KEY CONTACT POINTS**

A : Saddle height

Measure from the center of the bottom bracket to the top-center of the saddle.

B : Saddle setback

This is best measured with a plumb bob (any long string with a weight on it will do).

Place the string on the tip of the saddle and drop the weight below the bottom bracket.

After it steadies, measure horizontally from the string to the center of the bottom bracket.

C : Reach

Measure from the tip of the saddle to the top-center of the bars.

D : Handle bar drop

Measure vertically from the top of the saddle to the ground.

Then measure vertically from the top-center of the bars to the ground.

Subtract the second measurement from the first.

**OTHER BIKE SPECS**

Horizontal TT length

Stem length and angle

Headset Spacers (in mm)

## BODY INFORMATION

Please take all measurements in cm

Weight \_\_\_\_\_

Age \_\_\_\_\_

## THE FOUR KEY CONTACT POINTS

A : Total height

B : Total body length

Your sternal notch is the notch at the base of your neck.

Stand up straight with your feet at shoulder width. Measure from your sternal notch to the floor.

C : Inseam

Wear your cycling shorts, and take the measurements in bare feet.

D : Arm length

E : Forearm length

F : Tight length

G : Lower leg length

H : Trunk length
